**Intelligent HACCP  
Solutions  
for the food industry**

## OVERVIEW

i-SAFAS allows you to effectively monitor and record the HACCP information that you must retain, by law. The system puts you in control of your HACCP Management Programme, without the need for endless paperwork records. It is fast and accurate and can deliver real-time updates – from a single facility to a widely dispersed estate.

## KEY FEATURES

*i*-SAFAS is a windows mobile based PDA application that provides users with a simple screen form to capture key HACCP information. The operator is guided through each sequence to record the required data. Data is sent via WIFI, direct connection or GPRS to the processing server upon completion of the data entry. If there is no connectivity the application stores data locally and uploads the information to the server when connectivity is restored. Once collected the data can be instantly and securely accessed and/or viewed online from anywhere in the world. Secure operator and managerial logins protect application from abuse and facilitates reporting on event staff productivity.

## BENEFITS

- ✓ Identify potential problems – before they become disasters
- ✓ Significant reduction in paperwork and storage
- ✓ Reduces time and cost in HACCP monitoring
- ✓ Legal compliance
- ✓ Evidence of Due Diligence

Safety Audit Systems

**Intelligent HACCP  
Solutions  
for the food industry**

## ADVANTAGES

- ✓ Fast, efficient, real-time data capture
- ✓ Minimising paper based capture and re-keying of data improves data quality
- ✓ Low cost hardware – industry standard devices
- ✓ Low cost maintenance of remote users
- ✓ Live data monitoring & reporting
- ✓ Operator performance assessment from live reports
- ✓ Easy to use, minimal training required
- ✓ Flexible – can be used in many different catering environments
- ✓ Update ALL devices at the same time without having to recall any hardware

## FLEXIBLE SOLUTIONS

i-SAFAS has been developed to be flexible and adaptable to meet the specific needs of your business. Each module can be tailored to fit your operation and the system can grow with your business.

As part of their 'due diligence', your clients will want to be certain that you are operating safely and legally. i-SAFAS provides them a high degree of confidence in your management.

i-SAFAS is easy to demonstrate to potential customers, when they request proof of your food safety capabilities

## COST - EFFECTIVE

If you are currently managing your HACCP systems diligently, you will know that it takes time and costs your business money. Paper-based systems are time-consuming to keep up to date and demanding to analyse. i-SAFAS can help to improve efficiency and reduce costs. Acceptable data is simply stored but non-compliance issues are immediately highlighted – allowing you to focus precious resources where they are needed most.
